Coverage note

BIS's Scheme-I page contains hundreds of entries and groups products into categories such as cement, feeding bottles, oil pressure stoves, automobile accessories, cylinders/valves/regulators, hinges, cycle/rickshaw tyres and tubes, rubber gaskets and laboratory glassware. The BIS Product Manuals page additionally covers steel, aluminium, rubber, electrical, plywood, solar pumping and other products. BIS's Know Your Standard portal is the authoritative route for expanding an IS number into its associated Indian Standard, amendments, Gazette notifications, testing/inspection scheme, licences, laboratories, classification and committee details.

Important: 'BIS approved' is not a single status. BIS certification is generally voluntary, while certain products are made compulsory through Quality Control Orders (QCOs), with different conformity-assessment schemes. Status should therefore be stored as a separate field and verified against the current BIS source.
