

BIS Trusted Official-Source Product & Material Dataset

This PDF contains only records identified from BIS official sources. It is a verified seed dataset, not a claim of complete coverage of every BIS standard. BIS's current Scheme-I page lists product/IS entries and QCO references; Know Your Standard provides associated standard documents, amendments, Gazette notifications, testing/inspection schemes, licences, laboratories, classification and committee data.

Trust / status rule

BIS certification is generally voluntary. A product is treated as compulsory only where the Government has made compliance mandatory through a relevant Quality Control Order or other notified mechanism. Therefore, this dataset deliberately records certification/status as context rather than labeling every IS standard as 'BIS approved'.
